With ednet. smart memory you can easily expand the storage of your iPhone or iPad by adding up to 256 GB using a MicroSD card.

Of course, you can also use ednet. smart memory as a traditional data cable and USB memory stick on a PC or Notebook. You can manage document, audio, video, as well as image files.

The app also offers many additional and useful functions (e.g. cloud storage support, media player, text editor, voice recorder, synchronization of contacts, calendars, as well as photos and much more).

ednet. smart memory combines multiple applications and replaces various devices. This smart all-rounder is the perfect companion, at work or at home.

Storage environment

Access all storage locations (external, internal, cloud) through the App.
Data management – move, share, delete, copy, etc.

Product Video

Simple and intuitive operation

Easy managing your data (internal, external, cloud) with just a swipe for example for direct sharing

Easy data management

Integrated media player for audio and video

Take pictures directly in the app, manage and share the image

ednet. smart memory expands the horizon

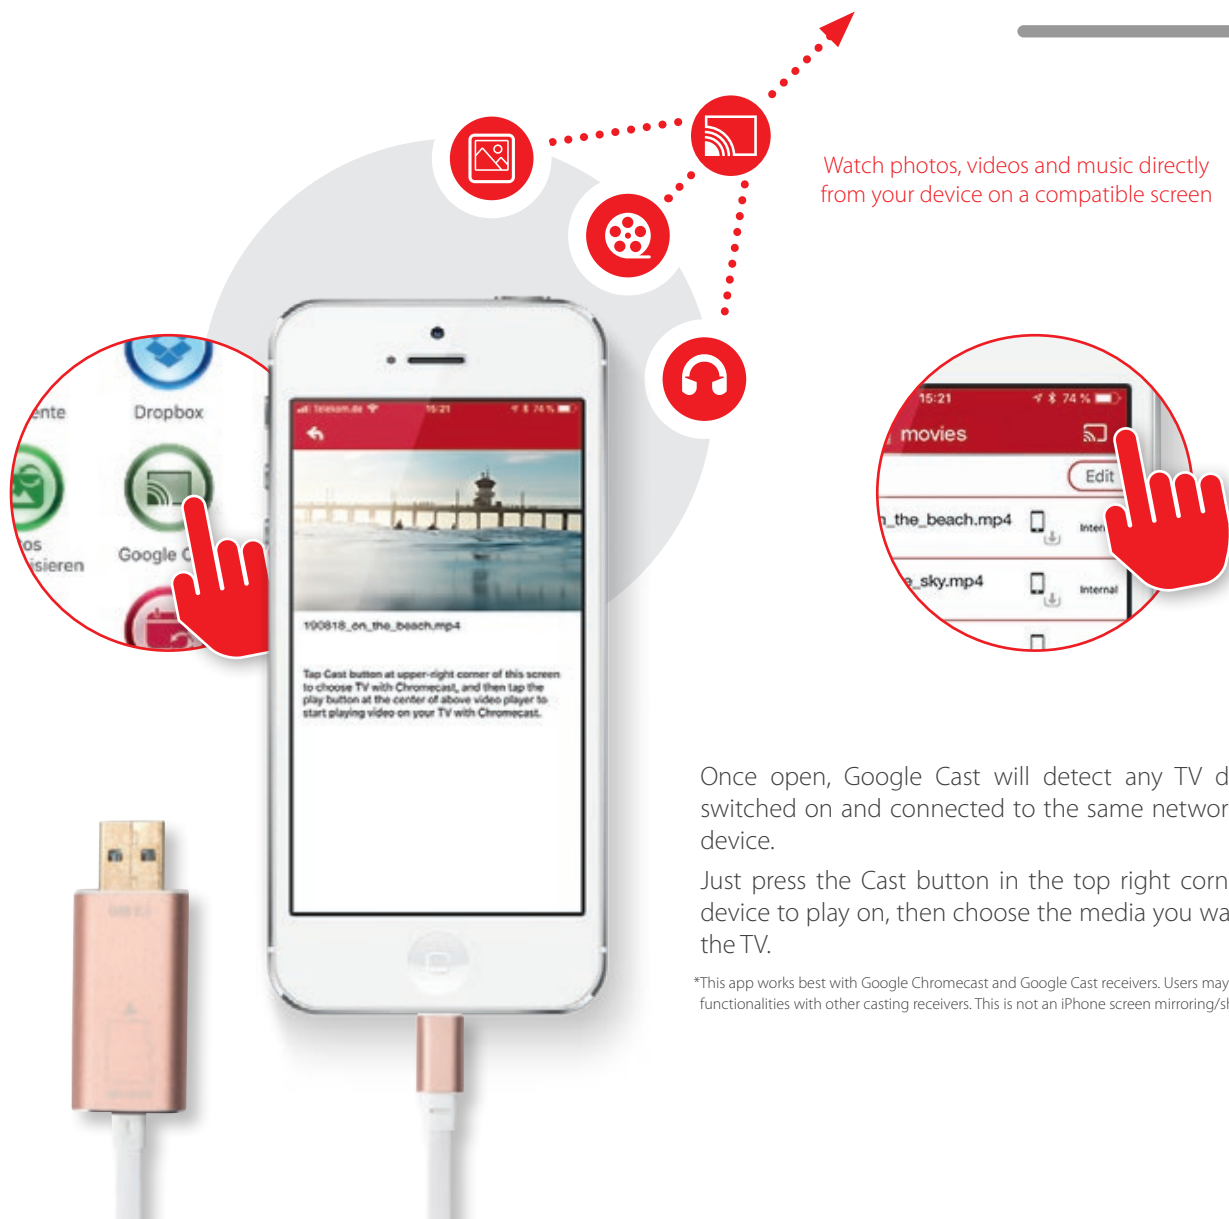

Enjoy movies, pictures and music on one screen

View all videos on your Chromecast device or other streaming devices.

Compatible devices:

- Chromecast 1, 2, and Ultra HD 4K
- Amazon Fire TV and Fire Stick
- Apple TV Airplay (4th gen) tvOS 10.2+
- Roku Express and Roku Streaming Stick
- DLNA receivers
- Xbox One, Xbox 360
- Google Cast receivers
- Smart TVs: LG Netcast and WebOS, Samsung, Sony and more

With Google Cast you can stream any video to your Chromecast device (movies, TV shows, sports, music and more). Simply navigate to your favorite video and stream it to your Chromecast device with a single tap.

Once open, Google Cast will detect any TV device that is switched on and connected to the same network as your iOS device.

Just press the Cast button in the top right corner, select the device to play on, then choose the media you want to send to the TV.

*This app works best with Google Chromecast and Google Cast receivers. Users may experience limited functionalities with other casting receivers. This is not an iPhone screen mirroring/sharing app.
