Systematic surveillance

Motion detection

All DIGITUS® Plug&View cameras allow you to be notified of any events directly by the camera, giving you a maximum feeling of security.

Security – everywhere, at all times

You can access and control your installed cameras from anywhere on your smartphone, tablet, or web browser. Since the cameras can be operated using Wi-Fi, you can set up the cameras virtually anywhere.

Cloud storage

If you want, your recordings can be synchronized centrally with Google Drive. This allows you to access your recordings later.

Share your feeling of security

Thanks to the sharing function, you can permit other people to access your images if you are out of town or you would like to share live images of the kids with your family, for example.

Use one system with multiple cameras at once

Whether in front of your entrance door, in your garage, or in the nursery – many home users would like to integrate multiple cameras into their surveillance system to be able to view several rooms at once.

With the DIGITUS® Plug&View system, you can display as many live camera images from your different Plug&View cameras in your web browser as you'd like.

DIGITUS®

Always know what's going on.

IP cameras to keep your home safe.

Cameras for indoor use

Cameras for outdoor use

Recording & backup

Simple installation in 3 steps via app

OptiVision Pro compact, portable mini IP camera

OptiPan IP camera with swivel and tilt function

OptiGuard IP camera with IP66 weather protection

OptiDome Pro vandalism-proof IP ceiling camera with manually adjustable visual angle

Network video recorder
The perfect addition to your Plug&View cameras!

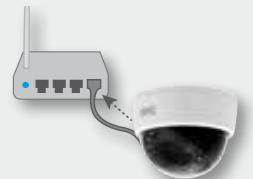

DIGITUS® Plug&View cameras feature a new, innovative setup method:

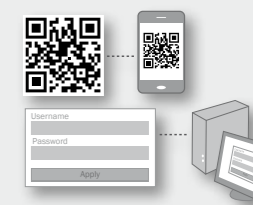

A connection is automatically established between the user and the camera via the "my-DIGITUS" online service and a custom code for each camera.

This eliminates the need for time-consuming, elaborate installation, making it extremely easy, as follows:

1 Establish network connection

2 Install app or register camera on www.plug-view.com

3 Done!
